CUSTOMIZED LIGHTING & SHADING DESIGN SERVICES

Lighting control and motorized shades are becoming an expected feature in today's homes. Wilshire offers design, installation, and integration of lighting and shading systems for convenience, safety, energy savings, and aesthetic appeal, giving you control of both natural and electric lighting in your home.

Wilshire's system designers have a unique expertise in the design and integration of lighting and shading systems. With a variety of styles, colors, finishes, and fabrics available, a customized lighting and shading design will ensure that these systems are successfully integrated into your home's aesthetics and décor.

Our design services are engineered to take your project from concept to completion. A properly designed system by Wilshire Media Systems will communicate your home's technology needs with your design team and contractor.
